The E-safety long term plans details which aspects of E-safety should be covered each term. These lessons may be delivered in any subject within the timetable or as stand-alone sessions as judged most appropriate by the class teachers during the designated E-safety week.

Some parts of the LTP may be too demanding for some pupils. Staff will need to use their judgment, together with knowledge of each pupil's attainment and pace of learning, before making decisions about the delivery of each E-safety strand.

Throughout the year E-safety should be reinforced when opportunities arise, where appropriate to do so.
